Student Group Activity (Act 5 – SET B)

Development of a Web-Based Survey Management System for a Barangay Health Center

I. Objective

Develop a web-based survey management system that enables barangay residents to participate in surveys and allows barangay staff to create surveys, monitor responses, determine survey results, and generate reports.

The project must be developed using the following technologies:

- HTML
- CSS
- JavaScript
- PHP
- MySQL

II. System Requirements

A. resident Module

residents shall be able to:

1. Log in using:
 - **Username:** Resident Number
 - **Default Password:** Residents Number (or a system-assigned default password)
2. Change their password after their first login.
3. View active surveys.
4. Answer surveys only once.
5. Submit survey responses.
6. View confirmation after successful submission.
7. Update their profile (optional).

B. Staff Module

staff shall be able to:

1. Securely log in to the system.
2. Create new surveys.
3. Edit or deactivate existing surveys.
4. Add various question types such as:
 - Multiple Choice
 - Yes/No
 - Rating Scale
 - Short Answer (optional)
5. Set survey opening and closing dates.
6. View the list of respondents.
7. Monitor survey participation.
8. Automatically compute survey results.
9. Display survey statistics using tables and charts.
10. Generate printable reports.
11. Export reports to PDF or Excel (optional).

C. Database Requirements

The database should include, but is not limited to, the following tables:

- Residents
- Staff/Admin
- Surveys
- Survey Questions
- Survey Choices
- Responses
- Survey Results
- Login History (optional)

D. Functional Requirements

The system should be able to:

- Authenticate users.
- Manage resident accounts.
- Manage surveys.
- Record survey responses.
- Prevent duplicate submissions.
- Automatically calculate survey results.
- Display graphical summaries.
- Generate printable reports.

E. Non-Functional Requirements

The system should demonstrate:

- User-friendly interface
- Responsive web design
- Data accuracy
- Security through login authentication
- Organized database structure
- Efficient processing of survey responses

F. Suggested Pages

1. Residents

- Login
- Dashboard
- Available Surveys
- Survey Form
- Submission Confirmation
- Profile
- Change Password

2. Staff/Admin

- Login
- Dashboard
- Survey Management
- Question Management
- resident Management
- Results Dashboard
- Reports
- User Management
- Logout

III. Submission requirements

Submit the following:

1. Complete source code.
2. Video presentation (How to use the system)
3. residents' participation in the development (indicate w/c area of the system is developed by the resident)
4. MySQL database (.sql file).
5. Screenshots of the system:
 - Login Page
 - Dashboard/Home Page
 - Update Personal Information Page
 - Successful Update Confirmation

Evaluation Criteria

Criteria	Percentage
Functionality	40%
User Interface	20%
Database Design	15%
Code Organization	15%
Documentation/video	10%
Total	100%

Submission Deadline

Submit your project during the next class meeting. Late submissions will be subject to the instructor's grading policy.
